

I'm not a bot

To solve the problem of iPhone/iPad not being recognized by iTunes on Windows 10, first check if the Apple Mobile Device USB Driver is installed. Open Control Panel > Device Manager > Universal Serial Bus Controllers and locate Apple Mobile Device USB Driver. If it's not there, try updating it by right-clicking and selecting Update Driver Software... Browse to C:\Program Files\Common Files\Apple\Mobile Device Support\Drivers or C:\Program Files (x86)\Common Files\Apple\Mobile Device Support\Drivers. Click Let me pick from a list of device drivers on my computer and select Apple Mobile Device USB Driver. Alternatively, try reinstalling the driver by downloading it from Apple's official website.
