

I'm not a bot

Massimo citro pdf

Skip to content Explains the universal information code connecting every person, plant, animal, and mineral and its applications in science, health care, and cosmic unity • Examines research on consciousness, quantum physics, animal and plant intelligence, emotional fields, Kirlian photography, and the effects of thoughts, emotions, and music on water • Reveals the connections between the work of Ervin Laszlo on the Akashic field, Rupert Sheldrake on morphogenetic fields, Richard Gerber on vibrational medicine, and Masaru Emoto on the memory of water DNA dictates the physical features of an organism. But what dictates how something grows—from the division of cells in a human being to the fractal patterns of a crystal? Massimo Citro reveals that behind the complex world of Nature lies a basic code, a universal information field—also known as the Akashic field, which records all that was, is, and will be—that directs not only physical development and behavior but also energetic communication and interactions among all living and non-living things. The author examines research on consciousness, quantum physics, animal and plant intelligence, the power of intention, emotional fields, Kirlian photography, and the effects of thoughts, emotions, and music on water. Linking the work of Ervin Laszlo on the Akashic field, Rupert Sheldrake on morphogenetic fields, Richard Gerber on vibrational medicine, and Masaru Emoto on the memory of water, Citro shows how the universal information field connects every person, plant, animal, and mineral—a concept long known by shamans and expounded by perennial wisdom. Putting this science of the invisible to practical use, he explains his revolutionary system of vibrational medicine, known as TFF, which uses the information field to obtain the benefits of natural substances and medications in their "pure" informational form, offering side-effect-free remedies for health and well-being. Il Sistema non può essere messo in discussione e, nella mente di tutti, deve rappresentare il migliore dei mondi possibili. Per questo ha imparato a distogliere l'attenzione creando di volta in volta un nemico da combattere, che in questo caso è il virus. La massa rimane nell'ignoranza, nella mediocrità, nel senso di colpa e continua a ridurre a "complotto" un progressivo colpo di stato mondiale, che ha già reso schiava buona parte dell'umanità. La propaganda passa per visionari coloro che hanno compreso, mentre gli altri sono politicamente ammaestrati a rispettare correttamente le regole imposte dall'oligarchia. Una minoranza regge le sorti del pianeta e, in modo consapevole o meno, buona parte dell'umanità la sostiene: sono coloro che traggono vantaggi dal Sistema e da quello che "conviene" o che hanno sposato l'ideologia transumanista. Ricoprono posti di potere, dell'alta finanza, operano in Borsa, traggono guadagno dal caos e dalla disperazione. Viene loro assicurato successo, denaro, visibilità, potere: in cambio si devono impegnare a tradire i valori dell'umanesimo, della cultura, del classicismo, della bellezza, del sentimento. Il mondo è oggi diviso in transumanisti, che sostengono il Sistema a suon di crimini e menzogne, e umanisti che difendono la vita. Il Sistema è come una grande mela marcia. E in una mela marcia vivono bene soltanto i vermi. Apocalisse... l'Eresia continua. Ask the publishers to restore access to 500,000+ books. Un affascinante viaggio tra fisica, medicina, spiritualità e filosofia. Un'opera che finalmente ci spiega quei fenomeni fisici che i nostri sensi non percepiscono e che non sono magie o superstizioni, ma costituiscono una "nuova" scienza antica. La Scienza dell'Invisibile ci introduce, in maniera chiara e appassionante, a straordinarie scoperte scientifiche. È possibile dare informazioni all'acqua attraverso suoni, parole ed emozioni? E l'acqua ha una memoria? Possiamo trasferire a esseri viventi le proprietà terapeutiche dei farmaci senza doverli somministrare? Si potrà arrivare ai "farmaci digitali"? "Tutti sanno che una cosa è impossibile da realizzare finché non arriva uno sprovveduto che non lo sa e la inventa". Albert Einstein
