There have been many social media platforms that have been very popular among the people. Since the early days of the internet, there has been a desire among people to have social media platforms that help them connect and talk with each other. Within a few years, we started to see platforms such as Google Talk and Yahoo Messenger coming and taking over the market. All of these platforms were popular, but they were soon replaced by WhatsApp.WhatsApp, since it came into the market, has become a leading platform for connecting with friends and family. It has now become a big platform for everything, from school groups to workplaces to even businesses. WhatsApp is one of the most popular social media platforms available in the market today. Its ease of access made it a global success, and in various parts of the world, it is today the dominant social media platform, replacing all the other big platforms.How to Use WhatsApp WebWhatsApp Web is an extension of WhatsApp, and it allows users to stay connected to their account whenever, wherever they are. It works just like a normal WhatsApp in that it allows people to connect seamlessly. Users, with the help of WhatsApp Web, can check out their status, send and receive messages, share photos or videos,, or manage their older conversations. This web platform offers ease to those who don't have access to their always open and want to stay connected.It is also great for businesses to stay connected to their clients on a big client on a desktop or a laptop.WhatsApp Web ensures that the conversation stays on. No matter what that device is, be it a Laptop or a desktop, WhatsApp works fine on all of them.It has a great user interface that is almost the same as the application on the smartphone and it connects quickly with the device to ensure the smooth transfer of information from one device to another.It is also very safe and secure.The WhatsApp Web can be used by going to web.whatsapp.com.Set Up WhatsApp Web on a PC, Laptop, or Tablet Using Your PhoneWhatsApp Web is a convenient way to use WhatsApp on your computer, in a way that is similar and seamless just like your smartphone. It helps you to use your phone alongside your other tasks on the web application of WhatsApp. Here are some step-by-step guides for setting up WhatsApp Web on different devices, PCs, laptops, or tablets:Setting Up WhatsApp Web on a PCStep 1: Open Your Web Browser Start by opening your preferred web browser (like Chrome, Firefox, Edge, etc.) and navigate to web.whatsapp.comStep 2: View the QR CodeOnce the page loads, a QR will appear on the right side of the screen. This is needed to link your phone with WhatsApp Web.Step 3: Scan the QR code using your smartphones WhatsApp app.Step.4: Launch WhatsApp on Your SmartphoneOpen the WhatsApp application on your mobile device.Step 5: Tap on the Three Dots MenuOn Android devices, tap the three vertical dots located in the top-right corner of the screen.Step 6: Select Linked Devices and Tap Link a DeviceFrom the dropdown menu, choose Linked Devices, then tap on Link a Device.Step 7: Scan the QR Code Displayed on Your PC ScreenUse your phones camera to scan the QR code shown on the web.whatsapp.com page.Step 8: Access WhatsApp Web on Your PCOnce the QR code is scanned successfully, your WhatsApp account will instantly be logged into the web version on your PC.Setting Up WhatsApp Web on a LaptopThe whole process is the same as using WhatsApp Web on a desktop. You just need to be aware that the internet connection should be fast on both of your devices.Step 1: Go to web.whatsapp.comOpen your web browser and go to web.whatsapp.comStep 2: Check the QR CodeOnce the website is opened, you'll have a QR code on the side of the website.Step 3: Get Ready to ScanYoull need to scan the QR code using your phone.Step 4: Open WhatsApp AppLaunch WhatsApp on your smartphone.Step 5: Tap the MenuTap the three dots at the top-right corner of the screen.Step 6: Link a DeviceSelect Linked Devices and tap on Link a Device.Step 7: Scan and Log InScan the QR code on your laptop screen. Once scanned, WhatsApp Web will open on your laptop.Setting Up WhatsApp Web on a TabletAnother platform where WhatsApp Web works smoothly is a tablet, on a tablet, you can log in to your WhatsApp Web in a similar way as you would do on a laptop or a desktop.Step 1: Enable Desktop ViewOpen a web browser on your tablet and set it to Desktop Site mode.Step 2: Visit WhatsApp WebGo to web.whatsapp.com in the browser.Step 3: View the QR CodeAgain you'll find the QR code on the side of the website the same way as you'll find it on a desktop or a laptop.Step 4: Open WhatsApp on PhoneOpen WhatsApp on your smartphone, go to Settings > Linked Devices, and tap "Link a Device".Step 5: Scan the QR CodeThe camera will be opened, and scan the QR code visible on your tablet screen.Step 6: Access WhatsApp WebYou'll quickly be logged in to the WhatsApp Web and it will be set up on your tablet for easy messaging.Use Cases & Limitations of WhatsAppIt is also a great way to see the media that you have received on your WhatsApp on a bigger screen and to download the media on your desktop or laptop. There are certain limitations with WhatsApp Web that your device should be near your laptop or the device that is using the WhatsApp web application.The reason behind its popularity is because it is very easy to use and doesn't require much hardware to run. It also supports all the major operating systems on mobile devices as well as on PCs and Laptops.ConclusionWhatsApp Web is a great platform where you are connected to your account no matter where you are and what devices you are on. It is a safe and exciting experience to have WhatsApp on both your phone and your mobile devices. It hardly takes any time and once you're logged in, you can use the WhatsApp web for hours without any disconnection as long as the internet connection is fast across all the devices. These were the ways by which you can log in to WhatsApp Web on multiple devices such as Laptop, Desktop or tablet.It is truly a great way especially for big entities such as businesses because many times they need to access the work on a bigger screen. Also with WhatsApp Web, you get access to your keyboard so that you can type easily on a physical keyboard compared to a virtual one on a smartphone or a tablet (if you don't connect one to your tablet). By Victor Ashiedu Published July 29, 2019 WhatsApp web is a WhatsApp service that allows you to use WhatsApp from a browser on your computer. You do not need to install any software on your computer to WhatsApp web. Using WhatsApp from your computer has some benefits. Here are some of the benefits of using WhatsApp via a browser: Unlike using WhatsApp PC App, to use WhatsApp web you do not need to install any software on your computer. You can type faster using the keyboard on your computer With WhatsApp web you can download media (video and images) directly to your computer. You can also share video and photos from your computer You can use keyboard shortcuts Follow the steps below to connect WhatsApp on your phone to WhatsApp Web on your computer From your computer, open web.whatsapp.com (link opens in a new browser tab). The page below with the QR code will load. Open WhatsApp app on your phone. Then click the 3 dots on the top right of the App (highlighted in the previous image). Next, click WhatsApp Web. When you click WhatsApp Web, it will load a QR code scanner. Point the scanner on your phone to the WhatsApp QR code on your computer browser. WhatsApp on your computer will connect to WhatsApp on your phone! Below is a detailed list of the things you can do with WhatsApp web: Type and send messages using your keyboard Download media files (photos and videos) directly to your PC Read and respond to messages or start a new chat Respond directly or forward a message Start a new group Participate in group chats View the profile of your contacts Share documents, media files and contacts Send emojis, GIFs, stickers or recorded voice messages Mute notifications Select multiple messages to star, delete or forward Delete or clear all chats for a particular contact Search for messagesClick the new chat icon highlighted in the image below: The New chat window will load. You can do any of the following on the new chat window: Select a contact to chat with. Use the scroll button to scroll down to find more contacts. You can also use the search box to search for a contact you wish to chat with. Finally, you can create a group. Here is how: Click on the contact or group you wish to share files with. Then, click the file share icon (highlighted in the image above). File share options shown below will load. To share media files (videos or photos), click the icon labelled 1. Icon 2 will start the camera on your computer so you can take pictures and share them immediately. Use icon 3 to share documents (Excel, PDF, text, or Word). The last icon, labelled 4 is used to share contacts. Follow the steps below to reply a message directly, delete a message, forward or star a message. Hover over the message to highlight a drop-down arrow. Click on the arrow to display actions you can take on the chat. You can reply directly to the message by clicking Reply. Back to the chat options, to forward, delete or star a message, click the relevant button Follow the steps below: As usual, the first step to click on the chat or group. Then, click the 3 dots on top of WhatsApp Web. The options shown in the second image will be displayed. This section will demo how to send Emojis, GIFs and recorded messages with WhatsApp Web. Here are the steps: Click on the chat or group. To send Emojis, GIFs or stickers, click the icon on the left. Going back to the previous image, to record and send a voice message, click the icon on the right. If it is the first time you want to record voice message using WhatsApp Web, the app will request access to your microphone. A message similar to the image below will pop up. Check the box Remember this decision. Then click Allow. WhatsApp will start recording immediately. Start speaking. To cancel you message, click the icon labelled 2 below. When you finish recording, click icon labelled 1. When you click this icon, WhatsApp will send your recorded voice message immediately. If you wish to disconnect your WhatsApp from the computer, here are the steps: Open WhatsApp on your phone. Then, click the 3 dots on top right of the App (highlighted in the previous image). Next, click WhatsApp Web. All devices you are currently connected to via Web or PC App will be listed here. To log out from all devices, click Log out from all devices. WhatsApp Web is a very great tool that allows you connect and use WhatsApp from a browser. As I said at the beginning of this guide, you do not need to install any application on your computer to do this. If like me you use WhatsApp to communicate with your team you will find this feature very useful. You can chat with your team right from your computer while getting on with other tasks. I hope this guide made life easier for you. If you have any questions or comments, use the Leave a Reply form at the end of this page. Better still, respond to the Was this page helpful? question below.Was this page helpful?Yes (14)No (3) Victor Ashiedu We're committed to writing accurate content that informs and educates. However, if this content does not meet your expectations, kindly reach out to us through one of the following means. Respond to "Was this page helpful?" above Leave a comment with the "Leave a Comment" form below Email us at or via the Contact Us page. WhatsApp has become the most popular messaging app in the world, but it has also leaped off mobile devices and onto our browsers. Many of us value seeing our messages come onto our computer screens in real-time as we work, and WhatsApp gives us the option to reply more easily and quickly using our computer keyboards. Heres everything you need to know about WhatsApp Web and how to get started using it.Editors note: We used a Google Pixel 7 running Android 14 to develop these steps. We also verified the steps work on Apple devices using an iPhone 12 Mini running iOS 17.2.What is WhatsApp Web, and how does it differ from the desktop app?Edgar Cervantes / Android AuthorityWhatsApp Web is the online browser version of the mobile app. It enables you to receive your messages on your computer screen in real time, reply by typing on your keyboard, start new conversations andgroups, and search chat histories. You can receive message notifications from your browser if you have them enabled in the browser settings.However, unlike desktop and mobile apps, it doesnt allow you to make telephone and video calls. You also cant change your status. So there are a few shortcomings with the browser version but nothing that would be a deal-breaker.What are the differences between WhatsApp Web and the mobile app?Edgar Cervantes / Android AuthorityThe differences between the web version and the mobile app are the same as the desktop app. The mobile app gives you the full WhatsApp experience with all the bells and whistles. The browser version misses things like calling, video calls, and status updates.Setting up the browser version of WhatsApp is very quick and easy. The following steps assume you already have an account on the mobile app. If not, you need to do that first.On your computer, launch your browser and go to web.whatsapp.com.Now, launch WhatsApp on your phone.On Android, tap on the three-dot menu icon and select Linked devices. On iPhone, tap on the Settings tab and select Linked devices.Tap on Link a device.Use the phones camera to scan the QR code on the browser.Thats it. After a few seconds, your chats will be accessible through WhatsApp Web.You need to bear in mind a security vulnerability when using the browser version. When you close the browser tab or the browser completely it doesnt log you out of your WhatsApp account. If youre worried about your privacy, its essential to sign out of your WhatsApp account before closing the browser.On your smartphone, launch WhatsApp.On Android, tap on the three-dot menu icon and select Linked devices. On iPhone, tap on the Settings tab and select Linked devices.Tap on the linked computer.Hit Log out.One of the most common complaints people make about WhatsApp is the lack of an iPad version. Until Facebook rectifies that problem, WhatsApp Web is an excellent alternative to use on the tablet. The process is very similar.Open a browser on the iPad and go to web.whatsapp.com.You will see the QR code on the screen.Follow the same smartphone steps mentioned above to connect your iPad to WhatsApp.If youre using the Safari browser, you can even make an icon for the screen by tapping the Share button and choosing Add to Home Screen in the menu.The only downside to using WhatsApp on an iPad is that the notifications are pretty terrible. Youre relying on the browser to deliver the notifications, not WhatsApp. So unless you dont need to reply to messages immediately, you would need to keep the browser open and the iPad window awake to receive incoming new messages.FAQsCan you video chat on WhatsApp Web?No, video calls are unavailable on WhatsApp Web.Can you make a phone call on WhatsApp Web?No, like video chatting, audio calls are also unavailable on the browser version of the app.Can I update my status on WhatsApp Web?No, you cant update your status on WhatsApp Web.WhatsApp Web is an incredibly useful extension of the popular messaging app, allowing users to access their chats on a computer. This feature bridges the gap between mobile and desktop communication, whether for work or personal convenience. Following simple steps, users can link their accounts and make the most of WhatsApp's capabilities on a larger screen. This guide provides detailed instructions, highlights features, and addresses common questions and concerns.What is WhatsApp Web?WhatsApp Web is a browser-based version of the WhatsApp mobile application. It mirrors your phone's WhatsApp account, syncing all messages, contacts, and media files to your computer. This enables you to send and receive messages, share files, and access conversations in real time without relying solely on your smartphone. WhatsApp Web doesn't function independently; it relies on an active connection to the WhatsApp app on your phone. Any actions performed on the web version, such as sending messages or deleting chats, are instantly reflected on the mobile app.How to Set Up WhatsApp WebSetting up WhatsApp Web is a straightforward process. Here's how you can do it:Open a web browser on your computer and navigate to web.whatsapp.com.A QR code will be displayed on the screen.Open WhatsApp on your Android or iOSSelect Linked Devices' from the Linked Devices menu.Authenticate using your device's security method, such as a fingerprint, face recognition, or PIN.Scan the QR code on the computer screen. This will link your WhatsApp account to the web browser.Your WhatsApp chats will now appear on the computer screen, allowing you to send messages, share files, and more.If you need to unlink a device from WhatsApp Web, the process is quick and easy:Open WhatsApp on your phone and navigate to the Linked Devices' section.View Active Sessions in which a list of all devices currently linked to your WhatsApp account will appear.Tap on the device you wish to remove and select Log Out'.This will immediately disconnect that session.This feature is particularly useful if you forget to log out from a public or shared computer.Key Features of WhatsApp WebWhatsApp Web offers several features that make it a powerful tool for users:Messaging: Send and receive text messages, photos, videos and voice notes.File Sharing: Easily share documents, PDFs, images, and videos.Media Viewing: View and download media files directly on your computer.Notifications: Receive desktop notifications for incoming messages, ensuring you don't miss important updates.Customisation: Adjust settings like notifications and chat backgrounds to suit your preferences.Syncing: Any changes made on WhatsApp Web are mirrored on the mobile app.These features provide a seamless user experience, especially for those who frequently switch between devices.What are the Limitations of Using WhatsApp Web?While WhatsApp Web is highly convenient, it does come with certain limitations:Dependency on Mobile: WhatsApp Web requires an active connection to the WhatsApp app on your phone. If your phone's battery dies or lose internet connectivity, WhatsApp Web will stop functioning.No Voice or Video Calls: WhatsApp Web does not support voice or video calling.Limited Settings: Some advanced settings, such as account management and privacy adjustments, can only be accessed through the mobile app.Browser Dependency: WhatsApp Web works best on specific browsers like Chrome, Firefox, and Edge. Other browsers may not provide full functionality.Despite these drawbacks, WhatsApp Web remains a valuable tool for many users.How to Make Calls Using WhatsApp WebCurrently, WhatsApp Web does not offer voice or video calling capabilities. Users who wish to make calls must use the mobile or the desktop app. This limitation has been a point of feedback for WhatsApp, and there's hope that future updates may include calling functionality for the web version.Troubleshooting Connectivity Issues on WhatsApp WebIf you experience problems with WhatsApp Web, consider these troubleshooting tips:Check Internet Connection: Ensure both your phone and computer have stable and active internet connections.Restart Browser: Close and reopen the browser to refresh the connection.Update WhatsApp: Verify that you're using the latest version of the WhatsApp app on your phone.Clear Browser Cache: Clear your browser's cache and cookies to resolve loading issues.Switch Browsers: If the issue persists, try using a different browser.These steps should resolve the most common issues, ensuring a smooth experience with WhatsApp Web.Frequently Asked Questions (FAQs)Is the video or voice call feature available on WhatsApp Web?No, these features are currently unavailable on WhatsApp Web. Use the mobile app for calls.Can you enable dark mode on WhatsApp Web?Yes, you can activate dark mode by going to the three-dot menu, selecting Settings', and choosing the Dark' theme.How many days will WhatsApp Web remain active once I log in?WhatsApp Web stays active as long as your phone has an internet connection. If inactive, it may log out automatically after 14 days.Is WhatsApp Web secure?Yes, WhatsApp Web uses end-to-end encryption to keep your messages private. Always log out from shared or public computers for added security.Can I use WhatsApp Web on multiple computers?You can link your WhatsApp account to multiple computers, but only one session can be active at a time.
