It includes questions to study from each chapter and tables to fill in with information on various mental disorders, including key symptoms, diagnostic criteria, prevalence, course, possible causes and most effective treatments. Students are instructed to answer the questions, quiz themselves without looking at answers, and repeat this process daily until the exam.0 ratings0% found this document useful (0 votes)703 views5 pagesThe document provides a study guide for an exam covering chapters 5-8 and 10 in Psy 311. It includes questions to study from each chapter and tables to fill in with information on various me100%(1)100% found this document useful (1 vote)4K views10 pagesThis document is a study guide for an abnormal psychology test with answers to true/false and multiple choice questions. Some key points covered include:- Most definitions of abnormality focus on distress and impairment rather than deviance or irrational behavior. - Around 48% of Americans will meet criteria for a mental disorder at some point in their life according to the DSM-. Classification systems are useful for research, treatment, and communication between professionals despite not being perfectly reliable or valid.- Current biological treatments for psychological disorders primarily involve psychotropic medication.100%(1)100% found this document useful (1 vote)4K views10 pagesThis document is a study guide for an abnormal psychology test with answers to true/false and multiple choice questions. Some key points covered include:- Most definitions of abnormality foDisclaimer: These questions are not IB official questions and are written with our best guess as to what the probable exam questions may look like. Not everypossible question is covered but rather a wide sample of questions has been asked so you can get an idea of the types of questions that may appear.Read MoreBiological approach core exam bank (link)Cognitive approach core exam bank (link)Sociocultural approach core exam bank (link)IB Psychology Revision Book Available NOW! Get your free preview here.The exam questions will be based on the topic and content headings as shown above. This page is taken from our IB Psych revision book now available from our online store (here).TOPICContentEssay QuestionsDiscuss one or more factors that might influence diagnosis.Evaluate one or more studies related to factors influencing diagnosis.Discuss one or more concepts of normality versus abnormality.Discuss one or more classification systems.Discuss how the use of classification systems may influence diagnosis.Discuss the role of clinical bias in diagnosis.Discuss how clinical bias may influence diagnosis.Discuss the validity and reliability of diagnosis.Discuss how one or more factors may influence the validity and/or reliability of diagnosis.Discuss one etiology of abnormal psychology.Contrast two etiologies of abnormal psychology.Evaluate one study related to the etiology of abnormal psychology.Evaluate one or more studies related to the etiology of one disorder.Evaluate one explanation for one disorder.Contrast two explanations for one disorder.Discuss two explanations for one disorder.Discuss the prevalence rates of one or more disorders.Discuss the prevalence rates of one disorder.Evaluate one or more studies related to the treatment of disorders.Evaluate one biological treatment for one disorder.Evaluate one study relevant to one biology treatment of disorders.Evaluate one psychological treatment with one psychological treatment for disorders.Discuss the role of culture in the treatment of disorders.Discuss one or more ways psychologists can assess the effectiveness of treatment.Evaluate the effectiveness of one treatment for disorders.Approaches (Bio, Cog & Socio-cult)If questions about the three core approaches are asked they will be based on the three topics for the abnormal option (diagnosis, etiologies and treatments).Factors Influencing Diagnosis*Discuss how one or more sociocultural factors may influence diagnosis.*It is unlikely students will be asked about biological factors in relation to factors influencing diagnosis. The difficulty in predicting exam questions for the diagnosis topic is one reason why the etiology or treatment topics are more appealing for exam preparation.Etiology of Abnormal PsychologyDiscuss the biological approach to understanding the etiology of abnormal psychology.Discuss the cognitive approach to understanding the etiology of abnormal psychology.Evaluate the sociocultural approach to understanding the etiology of abnormal psychology.Contrast the biological and cognitive approaches to understanding the etiology of abnormal psychology.Treatment of DisordersDiscuss the biological approach to the treatment of disorders.Evaluate the biological or cognitive approach to the treatment of disorders.Contrast two approaches (biological, cognitive or sociocultural) to the treatment of disorders.Research Methods & Ethical ConsiderationsQuestions about research methods and ethics will be based on the three topics for the for the abnormal option (diagnosis, etiologies and treatments).Research MethodsEssay QuestionsEvaluate the use of one research method used to study factors influencing diagnosis.Discuss approaches to research in the study of factors influencing diagnosis.*Evaluate the use of one research method used to study the etiology of abnormal psychology.Evaluate one or more research methods used to study the treatment of disorders.Evaluate one approach to research (i.e. one research method) used to study the treatment of disorders.Evaluate one research method used to study the treatment of one or more disorders.*the phrase approaches to research is used in the official IB Psychology guide and it means research methods (e.g. true experiments, correlational studies, etc.) Students should be prepared for this phrasing, but hopefully the IB exam team will use the phrase research methods so as not to get confused with the three approaches (bio, cog & socio-cult).Ethical ConsiderationsEssay QuestionsDiscuss one or more ethical considerations related to research on factors influencing diagnosis.Discuss one or more ethical considerations related to research on the treatment of disorders.Discuss one ethical considerations related to research on the etiology of abnormal psychology.Discuss one or more ethical considerations relevant to one study on the treatment of disorders.NotesPaper Two is essay questions only.SL students write one essay for one option, HL students write two essays on two options.There are three topics in the abnormal psychology option and there will definitely be one question per topic, which means you can safely study only one topic per option. HOWEVER, if youre doing this then you need to be prepared to answeranypossible question on that topic, including the three approaches, research methods and ethical considerations in relation to that topic.Noticed a mistake? Always feel free to let me know in the comments.Travis Dixon is an IB Psychology teacher, author, workshop leader, examiner and IA moderator.Page 2Disclaimer: These questions are not IB official questions and are written with our best guess as to what the probable exam questions may look like. This table is taken from our new revision book (available here).TOPICContentSAQsEssay QuestionsDescribe social identity theory.Explain how one study supports social identity theory.Evaluate social identity theory.Discuss social identity theorys explanation of human behaviour.Evaluate one or more studies related to social identity theory.Explain how belonging to social groups can influence behaviour. SAQ OnlyOutline social cognitive theory.With reference to one study, explain social cognitive theory.Evaluate social cognitive theory.Evaluate one or more studies related to social cognitive theory.Explain how stereotypes may influence human behaviour.Explain how and/or why stereotypes are formed.Discuss research related to stereotypes.Evaluate one study or theory related to stereotypes.Discuss the formation or effects of stereotypes.Explain one influence of culture on behaviour.Explain one cultural origin of behaviour.Discuss one or more ways culture may influence behaviour and/or cognition.Discuss one cultural origins of behaviour.Explain how belonging to cultural groups may influence behaviour and/or cognition. SAQ OnlyExplain the role of one cultural dimension in human behaviour.Outline one way cultural dimensions can influence behaviour.Discuss the influence of one cultural dimension on human behaviour.Evaluate one study related to cultural dimensions.Explain one cultural influence on individual behaviour.Discuss one or more cultural influences on individual attitudes, identity and/or behaviours.Explain one effect of enculturation on human behaviour.Outline one study related to enculturation.Discuss one or more effects of enculturation on human behaviour.Evaluate one or more studies related to enculturation.Outline one way cultural norms may influence human behaviour. SAQ OnlyDescribe one effect of acculturation on human behaviour.Discuss one or more effects of acculturation on identities, attitudes and/or behaviour.Evaluate one or more studies related to acculturation.Outline what it means to assimilate and how this may influence behaviour. SAQ OnlyResearch Methods & Ethical ConsiderationsQuestions about research methods and ethics will be based on the three topics for the sociocultural approach (the brain and behaviour, hormones and pheromones and behaviour and genetics and behaviour).Research MethodsShort Answer QuestionsOutline one research method used to study cultural influences on behaviour.Describe the use of one research method used to study the individual and the group.Explain how and why one research method is used to study cultural origins of behaviour and/or cognition.Explain the use of one research method used in the sociocultural approach to understanding human behaviour.Essay QuestionsOutline one research method used to study cultural influences on behaviour.Describe the use of one research method used to study the individual and the group.Explain how and why one research method is used to study cultural origins of behaviour and/or cognition.Explain the use of one research method used in the sociocultural approach to understanding human behaviour.Ethical ConsiderationsShort Answer QuestionsOutline one ethical consideration related to studies on the individual and the group.Explain one ethical consideration relevant to studies on cultural origins of behaviour.Outline one ethical consideration related to studies in the sociocultural approach to understanding human behaviour.Essay QuestionsDiscuss one ethical consideration relevant to studies on the individual and the group.Discuss one ethical considerations relevant to research on cultural influences on behaviour.Discuss one or more ethical considerations relevant to research on cultural influences on behaviour.Discuss one or more ethical considerations related to research in the sociocultural approach to understanding human behaviour.NotesPaper One has two sections A and B. In Section A you have three compulsory short answer questions, one from each approach (biological, cognitive and sociocultural). In Section B, you have three exam questions, also one from each approach and you answer onlyone.This means you should prepalcore approach topics for SAQs and you can choose one approach for essays.For short answer questions, because you can use the command terms interchangeably (outline, describe, explain) their selection for the above questions has been random.The italicized terms above (e.g. norms) are the SAQ additional terms. Its often difficult to predict how these will be phrased in IB exam questions. Also, these willnot appear in the 2019 exams (May and Nov), but may appear in SAQs from 2020 onwards.Disclaimer: These questions are not IB official questions and are written with our best guess as to what theprobableexam questions may look like. Therefore, noteverypossiblequestion is covered.Download a free preview or order your copy at Dixon is an IB Psychology teacher, author, workshop leader, examiner and IA moderator.Page 3Disclaimer: These questions are not IB official questions and are written with our best guess as to what the probable exam questions may look like.
