

I'm not a bot

You can quickly get to Google every time you open your browser by making Google your homepage. Change your homepage Choose a browser below, then follow the steps on your computer. If you don't see your browser below, go to the "Help" section of your browser and look for information on how to change your browser's homepage. Firefox Open your browser and visit www.google.com. Drag the tab to the Home button, then release. Click Yes. Google Chrome In the top right corner of your computer's browser, click More Settings. Under "Appearance," turn on Show home button. Select your current homepage or Enter custom web address. Then, enter: www.google.com. Safari In the top left corner of your screen, select Safari Preferences. General. Next to "New windows open with" and "New tabs open with," select Homepage. Next to "Homepage," enter: www.google.com. Internet Explorer In the menu bar on the top of your browser, click Tools. Select Internet Options. Click the General tab. Under "Home page," enter: www.google.com. Click OK. Restart your browser. Microsoft Edge In the upper right corner of your browser, select More Settings. Under "Set your homepage," click the Down arrow. A specific page or pages. If you have a current homepage: Next to the URL, click X. Click *Enter a URL*. Then, type: www.google.com. Google is stuck as my homepage Google won't change your homepage settings without your permission. Reset your homepage. Choose a browser above, then follow the steps to replace Google with the site you want as your homepage. Check for unwanted programs. If resetting your homepage doesn't fix the problem, you might have unwanted programs called malware that's imitating the Google site. Learn about malware and how to remove it. Post to the help community Get answers from community members If your phone or tablet uses Google Play Services, you can manage your Google apps and services in Google Settings. Open Google Settings Depending on your device, either: Open your device's Settings app, then tap Google. Open the Settings app. Manage your Google Settings Account Services In the recommended tab, you'll find key feature tiles and learn how to use them to help you get more from your Android device. To access additional features, head to the "All Services" tab. For example: Settings for Google apps Manage settings for Google apps. Connected devices & sharing Manage settings for features shared with other devices. Privacy & security Autofill & passwords Manage what information Google uses to autofill forms with personal information like your address, payment method, and passwords. Backup & restore Manage storage, manually backup your device, sync and restore contacts, or set up a nearby device. Kids & family Personal & device safety Manage settings for remotely locating and erasing a lost device and unknown tracker alerts. Driving Silence notifications while driving. Device policy Set up your work profile. Post to the help community Get answers from community members If you can't sign in, to try to get back into your Google Account, follow these steps: Tip: You may not find all the questions described here. If you already tried to recover your account and got a "Google couldn't verify this account belongs to you" message, you can try again. Answer as many questions as possible Try not to skip questions. If you're unsure of an answer, take your best guess rather than moving on to another question. Wrong guesses won't kick you out of the process. Use a familiar device & location If possible: Use a computer, phone, or tablet where you frequently sign in Use the same browser (like Chrome or Safari) that you usually do Be in a location where you usually sign in, like at home or at work Be exact with passwords Details matter, so avoid typos and pay attention to uppercase and lowercase letters. Passwords If you're asked for the last password you remember, enter the most recent one you recall. If you don't remember your last password: Use a previous one that you do remember. The more recent it was, the better. If you can't confidently recall any previous passwords: Take your best guess. Enter an email connected to your account If you're asked to enter an email address you can check now, enter one that you've added to your account. Here are some examples: A recovery email address helps you get back in and is where we send you security notifications. An alternate email address is one you can use to sign in. A contact email address is where you get information about most Google services you use. Check your spam folder for a message Important: Google never asks for your password or verification codes over email, phone call, or message. Only enter your password or verification codes at accounts.google.com. If you expected an email from our team but can't find it, check your spam or junk folder for an email titled "Your Google support inquiry". What if I still can't sign in?
